Subject: NOAA mission

Acting Under Secretary Jacobs,

Since when is the mission of NOAA to bend over backwards to massage the ego of a malevolent, ignorant buffoon sitting in the Oval Office?

Isn't NOAA supposed to be an impartial, scientific agency that the American public is supposed to trust to bring us factual information? information our lives may rely on?

Shame on NOAA for undermining the hard work of the National Weather Service.

Shame on NOAA for joining the spineless that enables president of the US who is the closest thing we've ever had to a tyrant.

Not only do we have to worry about the war on women, immigrants, black and brown Americans...now we have to worry about NOAA spinning its own information to suit the needs of an idiot with a sharpie.

The war against science and facts is a trademark of the Trump Administration. The EPA has already stifled and eradicated the work of its own scientists.

I guess NOAA and the NWS are now official casualties of the same war.

Kiss the credibility of NOAA goodbye.
